I started in programming, ended up in design and never stopped following AI. I've designed websites and apps since 2016. Today I create working versions of my designs with coding agents. I decide the architecture, the states and the UX, and I review the code they write.

Experience

Freelance web designer and developer

2018 – now

Websites for my own clients, design and code.

UX/UI designer, Intuition Studio

2023 – 2026

Two apps for a tax and HR product and their design system. The Urban Safety website in Webflow. A coded brain-health app prototype in five days, a pre-sales agent for the studio and websites for restaurants.

UX/UI designer, Proyecto.cz

2020 – 2022

Web designer and developer, Antee.cz

2016 – 2018

Selected projects

Weaver

2026, in progress

Astro, React, TypeScript, Cloudflare

Keeps a small business's website, posts and emails in plain files an AI agent can work in. The owner compares each change with the live page and edits the details. Demo done, client version in progress.

Design Mentor

2026

Master's thesis · Next.js, Vercel AI SDK, Gemini

An AI mentor that takes design students through a project in 12 steps, asking questions instead of giving answers. The model returns checked data and the interface stays fixed. Five students used it.

Agent UI Patterns

2026

React, TypeScript · agent-ui-patterns.netlify.app · public on GitHub

Eight patterns that help people follow an AI agent's answer and check it. Each is a working component with a timeline you can scrub.

Client-First Webflow skills

2026

Agent skills, Webflow MCP · public on GitHub

Two skills that keep coding agents to one design system in Webflow and check every write through its MCP.

Education

Prague University of Economics and Business

Faculty of Informatics and Statistics · master's thesis 2026

University of Hradec Králové

Applied informatics, bachelor's · 2018 – 2022

Design

Product and interface design

Design systems

Prototyping

Figma, Framer, Webflow

Build

HTML, CSS, JavaScript

React, TypeScript, Next.js, Astro

Claude Code, Codex, agent skills, MCP

AI interfaces: streaming, structured output, tool calls

Languages

Czech, native

English, fluent (C1)
